

**Engineering Placement Student**  
**Specific Purpose Role- Full Time (37.5 Hours)**  
**Starting Salary- £17,938**  
**Ref: fe/20/05**

*firmus energy is responsible for the construction and operation of a natural gas network of over 1,500km across more than 30 cities, towns and villages in Northern Ireland. As well as connecting over 45,000 customers across its own licensed area, firmus energy also competes in the competitive natural gas market in Greater Belfast, where it supplies over 50,000 customers.*

*The future looks bright at firmus energy and for those who are part of our team. We offer excellent remuneration and benefits packages, together with comprehensive training and development programmes and the opportunity to excel in challenging and progressive roles.*

**The role:**

Rotating between Health, Safety and Environmental, Construction and Operations & Maintenance teams, the Placement Student will gain practical experience in an established Engineering environment within the gas industry.

**Key Accountabilities:**

- Research into legislative and industry standards applicable to the gas industry
- Assist in the audit and development of operational procedures, maintenance programmes and quality plans
- Support the Engineering Management in managing Non-conformances and safety observations
- Assist in the audit of Contractor's HSQE functions and Engineering Department activities
- Assist in research of suitable new technologies for the company
- Develop working knowledge of Engineering systems
- Assist in the planning of day-to-day construction and operations & maintenance activities on the firmus energy gas distribution network
- Liaise and build relationships with internal and external contacts to support project delivery in line with expectations
- Support the resolution of complaints for Engineering works
- Respond to enquiries from installers and/or their operatives

**The Individual:**

The successful candidate for this placement will be a diligent individual, capable of working on their own initiative, and capable of working in a technically complex team, whilst developing and maintaining excellent client relationships both internal and external to the company.

**Knowledge/Skills & Experience**

**Essential:**

- Undergraduate studying an Engineering (Civils, Mechanical or Built Environment) or HSE (Health, Safety & Environmental) discipline
- Knowledge of IT systems, including Microsoft Word, Excel, Access, Powerpoint (knowledge of a Graphical Information System (GIS) would be desirable)
- Excellent communication and interpersonal skills
- Capable of structured analysis of data and presentation of results across operational areas
- Ability to work in multi-disciplinary teams

***Applications (including a cover letter detailing how you meet the criteria and a current CV) to be sent to [recruitment@firmusenergy.co.uk](mailto:recruitment@firmusenergy.co.uk) by Friday, 21 February at 5pm.***
