Subject to Conditions 3.2.3 and 3.2.5, the Licensee shall:

- (a) subject to Condition 3.2.2, install and bring into operation (or make readily capable of being brought into operation) distribution pipe-lines such that, in respect of any Development Area and each Gas Year, the number of premises that are readily connected by the end of that Gas Year is equal to or greater than 50% of the Annual Target for that Development Area and that Gas Year; and
- (b) subject to Condition 3.2.2, install and bring into operation (or make readily capable of being brought into operation) distribution pipe-lines such that, in respect of each Gas Year, the aggregate number of premises in all the Development Areas that are readily connected by the end of that Gas Year is equal to or greater than 90% of the Cumulative Target for that Gas Year.

3.2.2 Housing Executive & Regional Development Strategy

The Annual Target for any Development Area and any Gas Year shall be reduced by a number equal to the number of:

- (a) premises in that Development Area which are owned by the Northern Ireland Housing Executive or any housing association in Northern Ireland and which have not during that Gas Year been adapted for the consumption of gas; and
- (b) premises that are forecast to be constructed in that Development Area and that Gas Year in the timetable outlined in an estimated rollout plan (developed by the Licensee in accordance with the Department for Regional Development Regional Development Strategy Document for Northern Ireland 2025 “Shaping Our Future” (published on 20 September 2001) and agreed with the Authority) and which have not during that Gas Year been so constructed;

provided and to the extent that:

FE Licence

- (c) the Licensee is able to demonstrate to the Authority's satisfaction that this shortfall in the number of premises so adapted and/or so constructed prevented the Licensee from meeting its obligations under Conditions 3.2.1, in which case the Authority shall make a consequent adjustment to the relevant Annual Targets for that Development Area in each subsequent Gas Year; and
- (d) in the event that any such premises are subsequently so adapted and/or so constructed, the Licensee shall inform the Authority as soon as reasonably practicable after becoming aware of the same, and the Authority may (having first consulted the Licensee), by notice in writing to the Licensee, add to the Annual Target for that Development Area and any subsequent Gas Year(s) a number of premises not exceeding that previously excluded pursuant to this Condition 3.2.2 which appears to the Authority to be appropriate in the circumstances.

3.2.3 Revising the Licensee's Obligations to Develop the Network

- (a) At the request of the Licensee, any Annual Target for any Development Area shall be revised as reasonably appropriate in all the circumstances:
 - (i) if the Authority is reasonably satisfied that exceptional circumstances (excluding lack of funds) which could not have been reasonably foreseen by the Licensee have prevented, or could reasonably be expected to prevent, the Licensee from complying with its obligations under Condition 3.2.1; or
 - (ii) if the Licensee and Authority so agree; or
 - (iii) if the Authority is reasonably satisfied that, due to any process required to be followed by an Applicable Law, which could not reasonably have been further expedited or avoided by the Licensee, the Licensee has been delayed in complying with its obligations under Condition 3.2.1.
- (b) Without prejudice to Condition 3.2.3(a), the Authority may, where the Licensee consents, by notice to the Licensee:

FE Licence

- (i) increase the Annual Target for any Development Area and any Gas Year to such number as is agreed; and/or
 - (ii) modify the Towns Development Plan and/or any Additional Development Plan as is agreed.
- (c) Without prejudice to Article 14 of the Order, where by virtue of the provisions of Condition 3.2.2 or this Condition 3.2.3, any Annual Target is revised, the revised Annual Target shall be applied for the purposes of this Licence and the revision shall (to the extent applicable) modify the relevant Conditions (including annex 2 to this Part 3).

3.2.4 General Development Plan

Without prejudice to the generality of any other provisions of this Licence, the Licensee shall in good faith pursue the general objectives of the General Development Plan set out in annex 3 to this Part 3.

3.2.5 Loss of Exclusivity

Notwithstanding Condition 1.1.4, where the Licensee ceases, in respect of any Development Area, to be entitled to exclusively convey gas by means of distribution pipe-lines (in accordance with Schedule 3), the obligations set out in Conditions 3.2.1 and 3.2.4 shall cease to apply to such Development Area with effect from the date on which such exclusivity is lost.

3.2.6 Annual Development Plan Report

The Licensee shall, by no later than 31 December of each year, provide to the Authority a report of its progress in (i) the development of the Network (having regard to its obligations under Conditions 3.2.1 and 3.2.4) and (ii) the development of the market for gas supplies (having regard to its obligations under Conditions 3.2.4 and 3.2.10) for (in each case) the Gas Year that ended on 30 September of that year. The Licensee shall also set out in that report, for the three Gas Years following that Gas Year, its plans for developing the Network (having regard to its obligations under Conditions 3.2.1 and 3.2.4). The obligation to provide such a report shall cease generally in respect

FE Licence

of the Gas Year commencing 1 October 2018 and each Gas Year thereafter; and shall cease in particular with regard to the development of the market for gas supplies in respect to those markets for gas in which the Supply Licensee is subject to competition from other gas suppliers.

3.2.7 Publication of Report

The Licensee shall, subject to any requirement to comply with Condition 3.2.8:

- (a) publish the report provided under Condition 3.2.6 in such form and manner as the Authority, having regard, so far as practicable, to the need to exclude publication of a matter that would or might seriously and prejudicially affect the commercial interests of the Supply Licensee, may direct; and
- (b) send a copy of that report to any person who asks for one on payment of a charge in respect of the cost incurred by the Licensee in complying with this requirement which shall not exceed such amount as the Authority may from time to time direct.

3.2.8 Particular interests

In complying with the requirements of Condition 3.2.7, the Licensee shall have regard to the need for excluding, so far as practicable:

- (a) any matter which relates to the affairs of an individual, where the publication of that matter would or might seriously and prejudicially affect the interests of that individual; and
- (b) any matter which relates specifically to the affairs of a particular body of persons, whether corporate or unincorporated where publication of that matter would or might seriously and prejudicially affect the interests of that body.

3.2.9 Determination by Authority of particular interests

Except in so far as the Authority consents to the Licensee not doing so, the Licensee shall refer for determination by the Authority any question as to whether any matter

FE Licence

seriously and prejudicially affects the interests of an individual or a body of persons or of the Licensee.

3.2.10 Development of the Market

The Licensee shall act to encourage the development of the market for gas supplies throughout all Development Areas, and shall, with respect to the premises in the Development Areas to which the Supply Licensee is entitled to supply gas exclusively (and for the periods during which the Supply Licensee may supply those premises exclusively), act so as to enable the Supply Licensee to compete effectively, in so far as is reasonably practicable, with alternative fuel supplies for those premises.

3.2.11 Conveyance in the Remaining Licensed Area

The Licensee shall not convey gas by means of distribution pipe-lines to any premises in the Remaining Licensed Area unless and until those premises fall within an Additional Development Area as designated under Schedule 1 of this licence.

3.6.2 Form of notification

Before delivering (or arranging to be delivered) to any premises a notification referred to in Condition 3.6.1, the Licensee shall provide to the Authority a draft of such notification and shall not deliver (or arrange the delivery of) such notification until the form thereof has been approved or modified by the Authority in accordance with this Condition 3.6.2. In the event that the Authority shall within 28 days of receipt by the Authority of the draft notification, notify to the Licensee any modifications which, in the reasonable opinion of the Authority, should be made to the draft notification, the notification given by the Licensee pursuant to Condition 3.6.1 shall be in the form of the draft as so modified. Annex 3 to Part 3

GENERAL DEVELOPMENT PLAN

The Licensee has prepared this development plan for a natural gas industry in Northern Ireland outside of the Greater Belfast Area. It has been constructed based on the strengths of BGE:

- Benchmark standards of health, safety and care for the environment in all aspects of the gas conveyance, storage and supply (including utilisation) business.
- First class engineering skills in the design, construction, planning, operation, control and maintenance of gas transmission and distribution systems.
- Fuel marketing expertise in highly competitive markets including appliance retailing and customer service operations and standards.
- Financial strength.
- Understanding and working with the implications of long term investments and returns.
- International professional project management skills in capital-intensive schemes.
- Gas purchase and supply/demand matching and contracting.
- Modern metering and billing techniques.
- Technical know how in all types of gas utilisation including CHP ensuring highest thermal efficiencies and safety.
- Employment and training of local employees.
- Experience in comprehensive customer care charters and working with consumer organisations.
- Commitment to ensuring equal opportunities for all.

FE Licence

The Licensee will develop an efficient and economic gas industry in accordance with this plan. It will spread the major benefits of natural gas to the Licensed Areas including environmental improvements, local employment, energy efficiency and fuel choice provision.

It will enable gas dependent industries, i.e. both those providing a service to a gas industry and those industries which can only operate with gas, to be established and it will attract industries from abroad which have experiences of using natural gas and for whose processes natural gas is the preferred fuel.

1. **Introduction**

This development plan has been produced by the Licensee. The Licensee has all the skills needed to ensure an ongoing safe and economic scheme, which will bring the advantages of choice, increased energy competition, convenience and environmental improvements to Northern Ireland energy consumers. The plan concentrates on the provision of natural gas in and around the ten towns/cities of Armagh, Antrim, Ballymena, Ballymoney, Banbridge, Coleraine, Craigavon, L'Derry, Limavady and Newry.

2. **Company Structure**

In order to implement this development plan the person to whom the Licence is to be assigned has been incorporated by BGE as a private limited company in the UK. It is intended that where possible local resources will be employed to produce and implement the long-term development plan for the Licensee and for the industry.

The Licensee will employ local people where possible and appropriate, while complying with Northern Ireland employment legislation. The Licensee and its contractors will provide training to ensure that all required standards are properly met.

3. **Market and Infrastructure Development**

The development of the natural gas market is based on on-going market research and on experience of market development in similar situations in Ireland and Great Britain, when offering natural gas as an alternative fuel in areas outside the existing gas supply area. The rate of expansion of the pipelines is designed so as to provide system integrity

FE Licence

and safety while meeting market needs in an optimal economic manner. The rate is capable of rapid adjustment to meet changing market needs.

4. **Organisation**

General

The Licensee will use best available technology and innovative arrangements with contractors and suppliers to make best use of existing and local resources to achieve the construction of a complex distribution system along with the installation of gas equipment and related services.

Engineering Work

Wherever possible the low-pressure mains and services work will be carried out by local personnel, trained to the required level of competence.

Control and Emergency Services

The safe operation and maintenance of the system will be first priority of the Licensee. The system will be constantly monitored by electronic sensors at district pressure reduction sites and other key locations on the system, and the information will be relayed to a central “grid control” and emergency service site. The centre will have the responsibility of dealing with gas escapes and other emergency procedures.

Whilst the majority of this work will be carried out by fully approved contractors, a small core team of specialists will be retained to maintain essential pressure control equipment and provide support to the emergency service. Professionally qualified and experienced engineering staff will be employed to coordinate non-routine operations involving “live gas” remedial works and to provide a call out service when required.

Metering

Advanced metering systems such as Quantum system and Automatic Meter Reading (AMR) are now in widespread use in Britain and Ireland and the Licensee wishes to adopt this technology where appropriate. Quantum is a smart card system providing for payment through local Post Offices, shops, etc in advance of gas consumption. This

FE Licence

system allows consumers to budget for their gas supplies and can minimise the occurrence of debt and reduce the need for reading visits into houses.

AMR systems are available based on the new ultrasonic meter which is much smaller than the traditional design. For these meters there will be limited need for meter reading visits although visits will still be required to respond to “flags” indicating meter tampering and other warning such as those indicating the need to change batteries.

All systems require some specialist skills which will be provided by the Licensee for the initial installation and subsequent training of personnel for maintenance and operation.

Domestic Customer Service

Installation work in customers’ premises is a specialist area. The registration scheme for gas installers (Confederation of Registered Gas Installers CORGI) in Northern Ireland is welcomed by the Licensee to facilitate the development of a pool of contractors qualified to work on natural gas which will be used as a resource for the industry.

Accreditation through CORGI in Northern Ireland, ongoing work between the Licensee and local training agencies and the establishment of an Approved Installers List (AIL) will minimise the risk to the public from incompetent installers.

Industrial and Commercial Services

Specialist skills will be required in the industrial and commercial sectors both for installation and conversion work. Links with existing burner suppliers and equipment manufacturers will be built upon to ensure a quality service to customers which will include:

- (a) assistance in the design and installation of new plant to take advantage of the latest fuel management and gas engineering utilisation techniques;

FE Licence

- (b) survey of existing plant, with detailed reports and recommendations on conversion requirements and costs, likely efficiency and performance improvements and reduced maintenance and service costs;
- (c) design of plan and controls to meet the regulations and Codes of Practice applicable at the time; and
- (d) the introduction of advanced technology, and the redesign or modification of plant to improve efficiency and increase productivity.

5. **Training**

To build a successful gas industry in Northern Ireland will require a highly skilled and competent work force. The Licensee will encourage the employment of local people and ensure that the necessary training and assessment is available. The company is in liaison with the Department of Education and Learning and using local training providers of Colleges of Further Education to provide the necessary skills training.

Construction of the distribution system will be undertaken by established gas contractors. An approved training scheme based on National Vocational Qualification Levels II/III will be employed (Gas Network Operations (GNO)) in order to ensure the highest standards of workmanship. All operatives will undergo a pre start assessment of competence and induction training. Safety training is regarded as an integral part of the project and this will be reflected throughout the life of the project.

For engineering, established contractors will provide for assessment of personnel. All teams will undergo an assessment of competence by the Licensee's management in the three main areas of gas safety, polyethylene pipe fusion and reinstatement.

Installers will be required to be CORGI or equivalent registered. In addition those installers who wish to join the Approved Installers List (AIL) will be required to be proven competent in additional ACOP modules including energy efficiency, system controls, gas fire, and gas fire with back boiler installation. All installers will be assessed by the training provider, e.g. DEL for competence including initial CORGI registration as well as the additional modules required to join the AIL. Depending on

FE Licence

the results on the results of this assessment further training and assessment will be undertaken.

Joint training for emergencies involving management, service and engineering personnel will be undertaken prior to gas being supplied.

PART 4 THE PRICE CONTROL CONDITIONS

Condition 4.1 Charging methodology for the conveyance of gas

4.1.1 The price control set out in this Part 4 allows the Licensee to recover Expenditure reasonably expected to be incurred and the designated rate of return, r_t , over the duration of the relevant recovery period.

4.1.2 The Licensee shall use all reasonable endeavours to set the Controlled Charges so as to ensure that, in respect of each Formula Year, the amount it recovers under its conveyance charging methodology for the use of the Network by gas suppliers shall not exceed the amount calculated in accordance with the following formula:

$$M_t = R_{E,t} (RPI_{iy_t} / RPI_E) - K_t$$

4.1.3 For purposes of Condition 4.1.2:

M_t = the maximum amount recoverable under the Licensee's conveyance charging methodology in that Formula Year t ;

RPI_{iy_t} = the sum of the values of the Retail Prices Index for each month in Formula Year t divided by twelve (in order to establish a mean value for RPI during that Formula Year);

RPI_E = the Designated Parameter of that name established at the most recent Review (as the base reference point for the Retail Prices Index);

$R_{E,t}$ = the Determined Total Conveyance Revenue for that Formula Year t calculated in accordance with Condition 4.1.4;

K_t = a value representing a correction factor as set out in Condition 4.1.6.

Calculating $R_{E,t}$

4.1.4 $R_{E,t}$ shall be calculated in accordance with the following formula:

$$R_{E,t} = \sum_i (P_{E,i,t} \cdot V_{E,i,t})$$

FE Licence

4.1.5 For the purposes of Condition 4.1.4:

\sum_i = the summation of the values across all Conveyance Categories i ;

$P_{E,i,t}$ = the Determined Revenue Per Unit in respect of Conveyance Category i for Formula Year t ;

$V_{E,i,t}$ = the determined volume (number of therms) of gas conveyed in the Formula Year t , in respect of each Conveyance Category i ;

Calculating K_t

4.1.6 For the purposes of Condition 4.1.2, K_t shall be calculated in accordance with the following formulae:

$$\text{either, } K_t = Z_{F,t-1} (1 + I_{F,t}/100)$$

if $Z_{F,t-1}$ is greater than $-0.4(M_{t-1})$

$$\text{or } K_t = -0.4 M_{t-1} (1 + I_{F,t}/100)$$

if $Z_{F,t-1}$ is less than or equal to $-0.4(M_{t-1})$

The $Z_{F,t}$ Term

4.1.7 The principal purpose of the $Z_{F,t}$ term is, in respect of Formula Year t , to:

- (a) establish the value of any:
 - (i) under-recovery of revenue (being the extent to which Actual Revenue is less than Allowed Revenue); or
 - (ii) over-recovery of revenue (being the extent to which Actual Revenue exceeds Allowed Revenue); and
- (b) adjust that value by reference to any under-recovery or over-recovery accumulated in years prior to Formula Year t .

FE Licence

4.1.8 For the purposes of Condition 4.1.6:

$$Z_{F,t} = (M_{F,t} - R_{E,t}(RPI_{iy_t}/RPI_E)) + Z_{F,t-1}(1+I_{F,t})$$

where

$M_{F,t}$ = the actual amount recovered by the Licensee under its conveyance charging methodology for the use of the Network by gas suppliers in Formula Year t ;

$I_{F,t}$ = the percentage interest rate in Formula Year t .

4.1.9 The value of $I_{F,t}$ shall be calculated in accordance with the following formulae:

(a) where $Z_{F,t} \geq 0$, then $I_{F,t} = r_t$,

(b) where $Z_{F,t} < 0$, then:

$$I_{F,t} = LIBOR_{1year,t-1} + 0.04 \quad \text{if } t=2017$$

$$I_{F,t} = LIBOR_{1year,t-1} + 0.03 \quad \text{if } t=2018$$

$$I_{F,t} = LIBOR_{1year,t-1} + 0.02 \quad \text{if } t \geq 2019$$

4.1.10 For the purposes of Condition 4.1.9:

$LIBOR_{1year,t-1}$ = the average GBP interbank lending rate with a 12 month period of maturity during Formula Year $t-1$. Calculated by averaging the 1 year LIBOR rates in GBP, on the 15 February, 15 May, 15 August and 15 November of year $t-1$; if LIBOR is not set on any of these days then the last figure set before the day is used.

4.1.11 For the avoidance of doubt, the Licensee shall forecast values of RPI_{iy_t} , $V_{F,i,t}$ and K_t (to the extent that the values are not known by 1st October of the Formula Year $t-1$), so as by its reasonable endeavours it makes a best estimate of them.

Special provisions for the first year of the revenue cap price control

4.1.12 The value of $Z_{F,t-1}$ in respect of Formula Year $t = 2017$ will be calculated as the sum of the $Z_{F,i,t-1}$ terms across all Conveyance Categories i determined in accordance with the

FE Licence

formula set out in Condition 4.2.10 of the licence that was in effect on 31 December 2016.

4.1.13 In respect of Formula Year $t = 2017$ and only for the purposes of Condition 4.1.6, M_{t-1} shall be calculated in accordance with the following formula:

$$M_{t-1} = \sum_i (P_{F,i,t-1} \cdot V_{F,i,t-1})$$

where

$P_{F,i,t-1}$ is the Actual Revenue Per Unit in respect of Conveyance Category i for Formula Year $t-1$;

$V_{F,i,t-1}$ is the Actual Volume in respect of Conveyance Category i for Formula Year $t-1$.

Condition 4.2 Review Process & Disapplication Notices

4.2.1 This Condition 4.2 sets out the process by which the core terms of the price control will be established by the Authority from time to time.

The Review

4.2.2 The Designated Parameters and the Determination Values applying in respect of each Formula Year t will be established in accordance with the process set out below (a “Review”).

4.2.3 A Review will take place:

- (a) at scheduled intervals by reference to the end of Formula Year $t=n$ (a “Periodic Review”); and
- (b) from time to time in accordance with Condition 4.5 (a “Special Review”).

Terms Relevant to Reviews

4.2.4 In respect of each Review (the “current Review”):

n is a Designated Parameter established (subject to Condition 4.5.2) by virtue of the Review immediately preceding the current Review. It denotes the Formula Year immediately preceding the first Formula Year in which the Determination Values and the Designated Parameters that are being established as part of the current Review will apply. In the case of the first Periodic Review only it shall be determined in accordance with Condition 4.2.5;

q is a Designated Parameter established as part of the current Review. It denotes the projected longstop Formula Year up to which Best Available Values must be submitted in accordance with Conditions 4.3 and 4.4;

m denotes the Formula Year immediately preceding the first Formula Year in which the Determination Values and the Designated Parameters which were established as part of the Review immediately preceding the current Review applied. Accordingly, $t = n$ for any Review is the same year as $t = m$ for the following Review; and

FE Licence

- a* denotes the then most recent Formula Year for which the Licensee has submitted Actual Values in accordance with Condition 4.6.

The First Periodic Review

4.2.5 Notwithstanding the other provisions of this Condition 4.2, the following provisions shall apply to the first Periodic Review alone:

- (a) for the purposes of the first Periodic Review, the Designated Parameter *n* shall be the year ending on 31 December 2005;
- (b) unless and until Condition 4.7 is modified, the Designated Parameters set out in Condition 4.7 (as at the time of Grant) will be deemed to have been established as such at the first Periodic Review;
- (c) the Licensee shall provide to the Authority the Best Available Values for the first Periodic Review (calculated in accordance with Conditions 4.3 and 4.4) based on the Designated Parameters set out in Condition 4.7 (as at the time of Grant) within 6 weeks of the date of the Grant;
- (d) the value of DAV_n used for the purposes of the first Periodic Review shall reflect that Capital Expenditure and Operating Expenditure incurred in the period up to 1 January 2006 (adjusted for cost of capital at the rate of LIBOR + 1%);
- (e) the Authority will, as part of the first Periodic Review and having considered any Best Available Values submitted by the Licensee, determine the Determination Values to apply in those Formula Years *t* occurring during the period $t = 1$ to $t = q$ (inclusive) for the first Periodic Review by notice to the Licensee prior to 1 January 2006;
- (f) the Licensee may, in respect of the first Periodic Review, serve a written “disapplication notice” on the Authority at any time prior to 1 March 2006. Such disapplication notice shall have effect from 1 January 2007 (the “disapplication date”). Following service of such a disapplication notice, and unless the Licensee withdraws the disapplication notice, Condition 4.1 shall,

FE Licence

with effect from the disapplication date, cease to have effect, unless by the disapplication date, the Authority has made a reference to the Competition Commission under Article 15 of the Order requiring the Competition Commission to investigate and report on whether the disapplication of Condition 4.1 may be expected to operate against the public interest.

Periodic Reviews Generally

- 4.2.6 The Authority will, at each Review, determine the Determination Values and the Designated Parameters that apply in those Formula Years t occurring during the period $t = n+1$ to $t = q$ (inclusive) for that Review.
- 4.2.7 The Licensee shall provide to the Authority the Best Available Values (calculated in accordance with Conditions 4.3 and 4.4) in respect of each Periodic Review, together with the Licensee's proposed Designated Parameters for that Review, by the earlier in time of:
- (a) the date occurring 18 months prior to the end of each Formula Year $t = n$; and
 - (b) the date occurring two months after the date on which the Authority has provided to the Licensee its proposed values for the Designated Parameters for that Review.
- 4.2.8 For each Special Review and in accordance with the timetable established by the Authority in accordance with Condition 4.5.6, the Licensee shall (to the extent directed to do so by the Authority in accordance with Condition 4.5.6) provide to the Authority Best Available Values for that Special Review (calculated in accordance with Conditions 4.3 and 4.4) and the Licensee's proposed Designated Parameters for that Special Review.
- 4.2.9 At the same time as it submits Best Available Values to the Authority in accordance with Condition 4.2.5(c), 4.2.7 or 4.2.8 (as applicable), the Licensee shall also provide such further accompanying information, evidence and other data with regard to the values submitted and the assumptions underlying the relevant estimates and forecasts as will be reasonably sufficient to enable the Authority to be satisfied that the Best

FE Licence

Available Values have been provided on a proper and consistent basis. The Licensee shall thereafter provide the Authority with any further such information, evidence or other data requested by the Authority.

4.2.10 The Authority will, at the conclusion of each Review and having considered any Best Available Values and proposed Designated Parameters submitted by the Licensee, determine the Determination Values and the Designated Parameters by modifying Condition 4.7 in accordance with Articles 14(8) – (10) of the Order. Such Determination Values and Designated Parameters shall be established having regard to any information provided to the Authority and any representations made to the Authority, including those previously made by the Licensee, and in particular those made by the Licensee in respect of the:

- (a) Licensee's aim of recovering the costs it has incurred by way of Capital Expenditure during the period up to the end of Formula Year q by the end of that Formula Year, together with a rate of return on those costs; and
- (b) Licensee's aim of recovering the costs it has incurred by way of Operating Expenditure during the period up to the end of Formula Year q by the end of that Formula Year.

Disapplication

4.2.11 Condition 4.1 (the "Charging Methodology" Condition") shall apply so long as this Licence continues in force but shall cease to have effect (in whole or in part, as the case may be) if the Licensee delivers to the Authority a request (a "Disapplication Request") made in accordance with Condition 4.2.13 and:

- (a) the Authority agrees in writing to the request; or
- (b) the application of the Charging Methodology Condition (or any part of them) is terminated by a notice (a "Disapplication Notice") given by the Licensee in accordance with Condition 4.2.14 and not withdrawn.

FE Licence

4.2.12 Save where the Authority otherwise agrees, no disapplication following delivery of a Disapplication Request shall have effect earlier than the date (the "Disapplication Date") which is the later of:

- (a) the date occurring 18 months after delivery of the Disapplication Request; and
- (b) the date occurring 6 months after the end of the Formula Year denoted by the Designated Parameter n applying at the date the Disapplication Request was delivered.

4.2.13 A Disapplication Request pursuant to this Condition 4.2.13 shall:

- (a) be in writing addressed to the Authority;
- (b) specify the Charging Methodology Condition, or any part of them to which the request relates; and
- (c) state the date from which the Licensee wishes the Authority to agree that the Charging Methodology Condition or the specified part of them shall cease to have effect.

4.2.14 A Disapplication Notice pursuant to this Condition 4.2.14:

- (a) may be given in the circumstances described in either Condition 4.2.15 or Condition 4.2.16;
- (b) may be withdrawn by the Licensee at any time prior to the Disapplication Date; and
- (c) where it is given, shall:
 - (i) be in writing addressed to the Authority;
 - (ii) specify the Charging Methodology Condition, or any part of them (which shall comprise only such part as was specified in the Disapplication Request) to which the notice relates; and

FE Licence

- (iii) state the date from which the Licensee wishes the notice to take effect, which shall not be earlier than the Disapplication Date.

4.2.15 The circumstances described in this Condition 4.2.15 are that, by the beginning of the period of six months which will end with the Disapplication Date, the Authority has not in response to the Disapplication Request published a decision under Article 14(8) of the Order to modify:

- (a) the Charging Methodology Condition, or any part of them to which the request relates; or
- (b) Conditions 4.2.11 to 4.2.16, so as to remove the right of the Licensee to give to the Authority a Disapplication Notice in respect of the relevant Disapplication Request.

4.2.16 The circumstances described in this Condition 4.2.16 are that:

- (a) by no later than the beginning of the period of six months which will end with the Disapplication Date, the Authority has in response to the Disapplication Request published a decision of a type referred to in Condition 4.2.15;
- (b) the Licensee has exercised its right to appeal to the CMA against that decision in accordance with Article 14B of the Order;
- (c) the CMA has, in respect of the provisions to which the Disapplication Request relates:
 - (i) quashed the decision of the Authority under Article 14E(2)(a) of the Order; and
 - (ii) neither remitted the matter back to the Authority under Article 14E(2)(b) of the Order nor substituted its own decision for that of the Authority under Article 14E(2)(c) of the Order; and
- (d) no more than 30 days has elapsed since the date on which the CMA quashed the decision of the Authority.

FE Licence

Closing Regulatory Value

4.2.17 If $DAV_{E,t=q} > 0$, this value shall be returned to the Licensee in those Formula Years following $t = q$, in accordance with the principles determined by the Authority at that time, such principles to provide (inter alia) for an allowed rate of return.

FE Licence

Condition 4.3 Establishing the Basic Best Available Values

4.3.1 The Licensee shall submit basic Best Available Values to the Authority at each Review in accordance with Condition 4.2 for, unless otherwise specified, each past, current and future Formula Year t up to and including $t = q$ for that Review. The Licensee shall submit Actual Values in respect of the basic Best Available Values for the Formula Years up to $t=a$, and shall use all reasonable endeavours to make its best estimate or forecast of the basic Best Available Values submitted in respect of the Formula Years from $t=a+1$ to $t=q$ (inclusive).

4.3.2 The basic Best Available Values are:

$V_{B,i,t}$ Best Available Volume in Formula Year t for Conveyance Category i ;

$C_{B,t}$ Best Available Capital Expenditure in Formula Year t ;

$C_{B,i,t}$ in Formula Year t and for Conveyance Category i , that proportion of Best Available Capital Expenditure in that Formula Year attributable to that Conveyance Category, using a methodology or methodologies approved by the Authority;

$O_{B,t}$ Best Available Operating Expenditure in Formula Year t ;

$O_{B,i,t}$ in Formula Year t and for Conveyance Category i , that proportion of Best Available Operating Expenditure in that Formula Year attributable to that Conveyance Category, using a methodology or methodologies approved by the Authority;

$D_{B,t}$ Best Available Annual Depreciation in Formula Year t ;

$RPI_{B,t}$ the sum of the Best Available values of the Retail Prices Index for each month in that Formula Year, divided by 12 (which gives a Best Available average value across that Formula Year);

FE Licence

$UAC_{B,t}$ the Best Available Uncertainty Mechanism Capex Adjustment in respect of each Formula Year t from $t=m-1$ to $t=n$ as calculated by the Licensee:

- (a) in accordance with the principles and methodology established by the Authority, and described in the Final Determination, for the purposes of calculating the Uncertainty Mechanism Capex Adjustment; and
- (b) by taking into account actual values in so far as they are available, and estimated values where actual values are not available, in respect of the Formula Year t for which the adjustment is calculated;

$UAO_{B,t}$ the Best Available Uncertainty Mechanism Opex Adjustment in respect of each Formula Year t from $t=m-1$ to $t=n$, as calculated by the Licensee:

- (a) in accordance with the principles and methodology established by the Authority, and described in the Final Determination, for the purposes of calculating the Uncertainty Mechanism Opex Adjustment; and
- (b) by taking into account actual values in so far as they are available, and estimated values where actual values are not available, in respect of the Formula Year t for which the adjustment is calculated; and

$RORA_{B,t}$ the Best Available Uncertainty Mechanism Rate of Return Adjustment in respect of each Formula Year t from $t=m+1$ to $t=n$, starting on or after 1 January 2017, as calculated by the Licensee in accordance with the principles and methodology established by the Authority, and described in the Final Determination, for the purposes of calculating the Rate of Return Adjustment.

FE Licence

4.3.3 To the extent the Best Available Values comprise monetary amounts, the Licensee shall express each such value in constant price terms (calculated in accordance with this Condition 4.3.3). For each of the Best Available Values submitted in respect of Formula Years $t=a+1$ to $t=q$ (inclusive), constant price terms shall mean that such forecasted values are all stated in the same money of the day terms as at the time they are all forecasted. For each of the Best Available Values submitted in respect of Formula Years up to $t=a$, constant price terms shall mean that such Actual Values are all converted to the same money of the day terms, by multiplying them by:

$$\frac{RPI_B}{RPI_{y_{B,t}}}$$

Where RPI_B is the Licensee's proposed value for that Designated Parameter, to apply to each of the Formula Years that are the subject of the current Review. It is the base reference point for the Retail Prices Index and will reflect the money of the day terms in which those Best Available Values that are forecasts were forecasted.

FE Licence

Condition 4.4 Establishing Best Available Revenue Per Unit and Total Conveyance Revenue

4.4.1 In addition to the basic Best Available Values referred to in Condition 4.3.2, the Licensee shall also (again in accordance with Condition 4.2) submit Best Available Revenue Per Unit values for each Review for each Formula Year t that is to occur during the period $t = n+1$ to $t = q$ (inclusive) for that Review. The Licensee shall use all reasonable endeavours to make its best estimate of the Best Available Revenue Per Unit for each Conveyance Category and for each such Formula Year ($P_{B,i,t}$). The Licensee shall also provide Best Available Total Conveyance Revenue for each Conveyance Category ($R_{B,i,t}$) and for each such Formula Year ($R_{B,t}$), where

$$R_{B,i,t} = P_{B,i,t} \cdot V_{B,i,t} \text{ and}$$

$$R_{B,t} = \sum R_{B,i,t}$$

4.4.2 This Condition 4.4 sets out the Best Available Value categories and the underlying calculations upon which the Licensee should base its values of $P_{B,i,t}$. In compliance with its obligation under Condition 4.2, the Licensee shall submit full workings of the calculations and figures upon which its values of $P_{B,i,t}$ are based.

4.4.3 The Licensee shall estimate values for the Best Available Revenue Per Unit ($P_{B,i,t}$) so that:

- (a) such values comply with the requirements set out in Condition 4.4.4;
- (b) such values reasonably reflect the differences in the respective costs of conveying gas for each of the Conveyance Categories, with reference to, without limitation, $C_{B,i,t}$ and $O_{B,i,t}$;
- (c) the values (being, by virtue of Condition 4.3.3, values stated in constant price terms) for each Conveyance Category i will not, unless otherwise agreed with the Authority, differ between Formula Years t .

FE Licence

4.4.4 Each value of $P_{B,i,t}$ shall be set so that the cash flow (adjusted to reflect the allowed rate of return) over the Formula Years in question is equal to the difference between the regulatory value at the end of Formula Year n of those assets acquired through Capital Expenditure and their depreciated value at the end of Formula Year q . This will be shown to be the case where the values of $P_{B,i,t}$ secure the following net present value result:

$$\sum_{t=n+1}^q \left(F_{B,t} \left(\frac{1 + r_{B,t} \cdot f_{B,t}}{(1 + r_B)^{t-n}} \right) \right) - TRV_{B,n} + \frac{DAV_{B,q}}{(1 + r_B)^{q-n}} = 0$$

4.4.5 For the purposes of Condition 4.4.4, the following terms shall have the following meanings:

n, q are Formula Years as defined in Condition 4.2.4 for the Review that $P_{B,i,t}$ is being forecast as part of. As the value of the Designated Parameter q for that Review is also being established as part of that Review, it will necessarily be the Licensee's proposed value of that Designated Parameter;

$\sum_{t=n+1}^q$ is the summation of data in respect of all Formula Years t from $t = n+1$ to $t = q$ inclusive;

$F_{B,t}$ is the Best Available Cash Flow for Formula Year t , (being a sum calculated in accordance with Condition 4.4.6);

$r_{B,t}, r_B$ is the Licensee's proposed value of the Designated Parameter for rate of return to apply to each of the Formula Years within the relevant period. Provided that, where the Licensee does not propose the same value for each of the relevant Formula Years, $(1 + r_B)^{t-n}$ shall be replaced with $(1 + r_{B,n+1}) \cdot (1 + r_{B,n+2}) \dots (1 + r_{B,t})$ and $(1 + r_B)^{q-n}$ shall be treated accordingly;

FE Licence

$f_{B,t}$ is the Licensee's proposed value of the Designated Parameter f to apply to Formula Year t , where f is an averaging factor (of between zero and one) to be applied to the rate of return, in recognition of the fact that the rate of return is being applied to an end of Formula Year value, but will in practice be recovered over the course of a Formula Year;

$DAV_{B,t}$ is the Best Available Depreciated Asset Value for Formula Year t (being a sum calculated in accordance with Condition 4.4.7); and

$TRV_{B,n}$ is, the Best Available Total Regulatory Value at the end of Formula Year $t = n$ for that Review (being a sum calculated in accordance with Condition 4.4.8).

Calculating $F_{B,t}$ (Cash Flow)

4.4.6 $F_{B,t}$ is an amount equal to the sum of the Best Available Conveyance Revenues for all of the Conveyance Categories and the relevant Formula Year, less the Best Available Capital Expenditure for that Formula Year, less the Best Available Operating Expenditure for that Formula Year, which shall be calculated as follows:

$$F_{B,t} = \sum_{all_i} (P_{B,i,t} \cdot V_{B,i,t}) - C_{B,t} - O_{B,t}$$

Calculating $DAV_{B,t}$ (Depreciated Asset Value)

4.4.7 $DAV_{B,t}$ is an amount equal to the indexed, depreciated, rolled forward value of Capital Expenditure to date, measured at the end of each Formula Year. In respect of Formula Year t therefore, it shall be the value of such amount applying to Formula Year $t-1$, plus the Best Available Capital Expenditure in Formula Year t , less the Best Available Annual Depreciation in Formula Year t , which shall:

(a) for each of the Formula Years $t = n+1$ to $t=q$ be calculated as follows:

$$DAV_{B,t} = DAV_{B,t-1} + C_{B,t} - D_{B,t}$$

FE Licence

(b) for Formula Year $t = n$ be calculated as follows:

$$DAV_{B,t} = DAV_{B,t-1} + C_{B,t} - D_{B,t} + \sum_{t=m-1}^{t=n} UAC_{B,t}$$

where $\sum_{t=m-1}^{t=n} UAC_{B,t}$ is the summation of the Best Available Uncertainty Mechanism Capex Adjustments for each Formula Year t in the period comprising Formula Years $t = m-1$ to $t = n$

provided that the Licensee shall, in forecasting $DAV_{B,t-1}$ and $DAV_{B,t}$ for any previous Formula Years, ensure that its forecasts are consistent with the Authority's most recent determinations of the Determined Depreciated Asset Value, so that:

$$DAV_{B,a} = DAV_{E,a} \frac{RPI_B}{RPI_E}$$

Where a denotes a Formula Year as defined in Condition 4.2.4.

Calculating $TRV_{B,n}$ (Total Regulatory Value)

4.4.8 $TRV_{B,n}$ is the Best Available Total Regulatory Value at the end of Formula Year $t = n$ for the Review in question. It is the sum of the Best Available Depreciated Asset Value for Formula Year $t = n$ (or in other words the opening position at the beginning of Formula Year $t = n+1$), plus any rolling incentive adjustments and adjustments related to the allowed rate of return, which shall be calculated as follows:

$$TRV_{B,n} = DAV_{B,n} + DA_B + PA_B + ORI_B + CRI_B + \sum_{t=m+1}^{t=n} RORA_{B,t}$$

Where:

PA_B is the Profile Adjustment (being an adjustment calculated in accordance with Condition 4.4.9);

FE Licence

ORI_B is the Operating Rolling Incentive (being an incentive calculated in accordance with Condition 4.4.10); and

CRI_B is the Capital Rolling Incentive (being an incentive calculated in accordance with Condition 4.4.11).

DA_B is an adjustment to take account of any difference between actual depreciation and depreciation allowed in the calculation of allowed revenues up to year n and is calculated as:

$$DA_B = \sum_{t=0}^n \left(D_{B,t} - D_{E,t} \cdot \frac{RPI_B}{RPI_E} \right)$$

$\sum_{t=m+1}^{t=n} RORA_{B,t}$ is the summation of the Best Available Uncertainty Mechanism Rate of Return Adjustments for each Formula Year t in the period comprising Formula Years t=m+1 to t=n.

Calculating the Profile Adjustment

4.4.9 The Profile Adjustment is an adjustment to reflect the long-term nature of the price control set out in the conditions in this Part 4 (The Price Control Conditions). The Determined Revenue Per Unit values are established at each Review by reference to the period to Formula Year t=q and not by reference to the period to Formula Year t=n. At each Review therefore, it is necessary to recognise the financial impact of having set a deferred recovery profile at the previous Reviews, by carrying forward the deferred value. The Best Available Profile Adjustment for each Review shall be calculated as follows:

FE Licence

$$PA_B = - \left(\begin{array}{l} \sum_{t=m+1}^n F_{E,t} \cdot (1 + r_{E,t} \cdot f_{E,t}) \cdot (1 + r_E)^{n-t} \\ - TRV_{E,m} \cdot (1 + r_E)^{n-m} \\ + DAV_{E,n} \\ + \sum_{t=m-1}^n UAO_{B,t} \cdot (1 + r_{E,t} \cdot f_{E,t}) \cdot (1 + r_E)^{n-t} \end{array} \right) \cdot \frac{RPI_B}{RPI_E}$$

Where:

m, n are Formula Years as defined in Condition 4.2.4 for the Review in question;

$\sum_{t=m+1}^n$ is the summation of data in respect of all Formula Years from m+1 to n (inclusive);

$F_{E,t}$, $r_{E,t}$, $f_{E,t}$, $TRV_{E,m}$, and $DAV_{E,n}$ are Determination Values and Designated Parameters established by the Authority at the previous Review in respect of Formula Years t, m or n (respectively);

r_E is the Designated Parameter for rate of return that applies to each of the Formula Years within the relevant period. Provided that, where the Authority did not establish the same value for each of the relevant Formula Years, $(1 + r_E)^{n-t}$ shall be replaced with $(1 + r_{E,t+1}) \cdot (1 + r_{E,t+2}) \dots (1 + r_{E,n})$ and $(1 + r_E)^{n-m}$ shall be treated accordingly.

$\sum_{t=m-1}^{t=n} UAO_{B,t}$ is the summation of the Best Available Uncertainty Mechanism Opex Adjustments for each Formula Year t in the period comprising Formula Years t=m-1 to t=n.

Calculating the Operating Rolling Incentive

4.4.10 The Operating Rolling Incentive is an incentive that guarantees the Licensee a specific number of Formula Years (w) of benefit in respect of any savings in Controllable Operating Expenditure regardless of when the saving is made. Where Formula Year n+1 occurs before the Licensee has had w Formula Years of benefit from any saving in Controllable Operating Expenditure, the Operating Rolling Incentive therefore adds to the total regulatory value an amount equal to that saving in Controllable Operating Expenditure that would have been made in the remaining Formula Years of period w. Where Formula Year n+1 occurs after the Licensee has had w Formula Years of benefit from any saving in Controllable Operating Expenditure, the Operating Rolling Incentive therefore subtracts from the total regulatory value an amount equal to that saving in Controllable Operating Expenditure that was made in the Formula Years after completion of period w. The Operating Rolling Incentive for each Review shall be calculated as follows:

$$ORI_B = g \cdot \sum_{t=0}^n \left(\begin{array}{l} \sum_{y=n+1}^{t+w-1} O_{I,t} \frac{1 + r_{B,y} \cdot f_{B,y}}{(1 + r_B)^{y-n}} \\ - \sum_{y=t+w}^n O_{I,t} \cdot (1 + r_{E,y} \cdot f_{E,y}) \cdot (1 + r_E)^{n-y} \end{array} \right)$$

where:

g is the Designated Parameter established at the preceding Review;

n is a Formula Year as defined in Condition 4.2.4 for the Review in question;

w is the Designated Parameter established at the preceding Review, and being the number of Formula Years for which the Licensee is entitled to retain an Incremental Saving;

$\sum_{t=0}^n$ is the summation of the results of the calculation within the large brackets in respect of each Formula Year *t* that occurs up until Formula Year *t=n*;

FE Licence

$\sum_{y=n+1}^{t+w-1}$ is, in respect of each Formula Year t , the summation of data in respect of the Incremental Saving (if any) first made in Formula Year t , for all the Formula Years (if any) y from $y=n+1$ to $y=t + w - 1$ (inclusive);

$\sum_{y=t+w}^n$ is, in respect of each Formula Year t , the summation of data in respect of the Incremental Saving (if any) first made in Formula Year t , for all the Formula Years (if any) y from $y=t + w$ to $y=n$ (inclusive);

$O_{I,t}$ is the Incremental Saving (if any) first made in Formula Year t . An Incremental Saving is said to have occurred in any Formula Year t in which the value of an Operating Saving in one Formula Year is greater than the value of the Operating Saving (if any) in the preceding Formula Year. The Operating Saving in each Formula Year is calculated (after the end of Formula Year t , and in respect only of those Formula Years to $t=a$) in accordance with the following calculation (and must be positive to be an Operating Saving):

$$O_{S,t} = O_{E,t} \frac{RPI_B}{RPI_E} - O_{B,t}$$

where $O_{E,t}$ is the Determined Controllable Operating Expenditure for Formula Year t ; and $O_{B,t}$ is the Best Available (at the date the calculation is made) Controllable Operating Expenditure for Formula Year t ; and

r_y, r is either the Licensee's proposed value of the Designated Parameter (highlighted by use of the B subscript), or the established Designated Parameter (highlighted by use of the E subscript) for the rate of return to apply to each of the Formula Years within the relevant period. Provided that, where the Licensee does not propose the same value for each of the relevant Formula Years, $(1 + r_B)^{y-n}$ shall be replaced with $(1 + r_{B,n+2}) \cdot (1 + r_{B,n+3}) \dots (1 + r_{B,t+w-1})$ and $(1 + r_E)^{n-y}$ shall be treated accordingly.

Calculating Capital Rolling Incentive

4.4.11 The Capital Rolling Incentive is an incentive that guarantees the Licensee a specific number of Formula Years (w) of benefit in respect of any savings in Capital Expenditure regardless of when the saving is made. Where Formula Year n+1 occurs before the Licensee has had w Formula Years of benefit from any saving in Capital Expenditure, the Capital Rolling Incentive therefore adds to the total regulatory value an amount equal to that saving in Capital Expenditure that would have been made in the remaining Formula Years of period w. Where Formula Year n+1 occurs after the Licensee has had w Formula Years of benefit from any saving in Capital Expenditure, the Capital Rolling Incentive therefore subtracts from the total regulatory value an amount equal to that saving in Capital Expenditure that was made in the Formula Years after completion of period w. The Capital Rolling Incentive for each Review shall be calculated as follows:

$$CRI_B = h \cdot \left(\sum_{t=0}^n \left(\sum_{y=n+1}^{t+w-1} C_{S,t} \frac{r_{B,y}}{(1+r_B)^{y-n}} - \sum_{y=t+w+1}^n C_{S,t} \cdot r_{E,y} \cdot (1+r_E)^{n-y} \right) + \sum_{t=n-w+1}^n C_{S,t} \frac{r_{B,t} \cdot f_{B,t}}{(1+r_B)^{t+w-n}} - \sum_{t=0}^{n-w} C_{S,t} \cdot r_{E,t} \cdot f_{E,t} \cdot (1+r_E)^{n-(t+w)} + DI_B \right)$$

Where:

h is the Designated Parameter established at the preceding Review;

\sum is the summation for Formula Years t or y (as the case may be) from the number below the summation sign to the number above the summation sign (inclusive);

$C_{S,t}$ is the Capital Saving (if any) made in Formula Year t. A Capital Saving is calculated (after the end of Formula Year t, and in respect only of those Formula Years to t=a) in accordance with the following calculation (and must be positive to be a Capital Saving):

FE Licence

$$C_{S,t} = C_{E,t} \frac{RPI_B}{RPI_E} - C_{B,t}$$

where $C_{E,t}$ and $C_{B,t}$ are the Determined Capital Expenditure and the Best Available (at the date the calculation is made) Capital Expenditure (respectively) for Formula Year t ;

$D_{E,t}$ is the Determined Annual Depreciation for that Formula Year; and

DI_B is the Best Available depreciation component modifying the incentive adjustment calculated according to the following formula:

$$DI_B = d \cdot \left(\sum_{t=0}^{n-w} C_{S,t} \frac{w}{l} \cdot (1 + r_{E,t} \cdot f_{E,t}) \cdot (1 + r_E)^{n-(t+w)} \right. \\ \left. + \sum_{t=n-w+1}^n C_{S,t} \frac{w}{l} \cdot \frac{1 + r_{B,t} * f_{B,t}}{(1 + r_B)^{t+w-n}} \right)$$

where d and l are the Designated Parameter established at the preceding Review.

Condition 4.5 Special Reviews and Informal Reviews

- 4.5.1 The Determination Values and Designated Parameters established at a Review will remain unchanged until the Authority issues a further notice to the Licensee in accordance with Condition 4.2.11.
- 4.5.2 Notwithstanding Condition 4.5.1:
- (a) the Authority may (after consultation with the Licensee) determine a new value for the Designated Parameter *n* (thereby triggering a Special Review) following the occurrence of any one or more of the events referred to in Condition 4.5.4; and
 - (b) where a new value is so determined, the value of the Designated Parameter *n* in Condition 4.7 shall be modified accordingly in accordance with Article 10(5)(b) of the Order.
- 4.5.3 The Licensee may, by written notice to the Authority, require the Authority to determine a new value for the Designated Parameter *n* in accordance with Condition 4.5.2 where the Licensee can demonstrate to the Authority's reasonable satisfaction that any one or more of the events referred to in Condition 4.5.4 have occurred.
- 4.5.4 The events referred to in Conditions 4.5.2 and 4.5.3 are that, at the time the Authority chooses to make a determination (in the case of Condition 4.5.2), or at the time the Licensee serves the relevant written notice (in the case of Condition 4.5.3):
- (a) the Best Available Capital Expenditure for the then current Formula Year (or any future Formula Year up to and including *n*) is likely to be in excess of the applicable Determined Capital Expenditure;
 - (b) the Actual Volume in the ten current, the preceding or any future Formula Year up to and including *n* has differed or is likely to differ by a factor of 15% (or more) from the Determined Volume, adjusted to take account of weather conditions (including temperature variability) in accordance with such rules as are approved by the Authority from time to time; and

FE Licence

- (c) the Licensee's obligations under Condition 3.2.1 have not been, or can reasonably be expected not to be, complied with.

4.5.5 Where, and at the time that, the Authority determines a new value for the Designated Parameter n in accordance with Condition 4.5.2:

- (a) if the sixth month of the then current Formula Year has not yet ended, the Formula Year determined as n by the Authority shall be the then current Formula Year; or
- (b) if the sixth month of the then current Formula Year has already ended, the Formula Year determined as n by the Authority shall be the Formula Year immediately following the then current Formula Year.

4.5.6 A Special Review will (like a Periodic Review) establish revised Determination Values and Designated Parameters. However, (unlike a Periodic Review) a Special Review shall be undertaken to establish new values for (and the Licensee shall provide Best Available Values and proposed Designation Parameters for) only those Determination Values and Designated Parameters as the Authority and the Licensee agree (or, in the absence of such agreement, as the Authority directs), and the values of the other Determination Values and Designated Values established at the last Review shall remain unchanged. The Licensee shall provide the required information in accordance with such timetable as the Authority may direct.

Informal Review for Increased Capital Expenditure

4.5.7 The Licensee shall give to the Authority an annual statement, at a time, in such form and accompanied by such supporting information as the Authority may direct, setting out in respect of all Formula Years for which Determination Values have been established, details of any Best Available Capital Expenditure which is likely to be in excess of the applicable Determined Capital Expenditure. In its statement to the Authority the Licensee shall provide such further accompanying information, evidence and other data with regard to the excess of expenditure as will be sufficient to enable the Authority to be reasonably satisfied that the proposed expenditure will be Capital Expenditure. To the extent that the Authority determines that such expenditure will be Capital Expenditure, such Capital Expenditure shall be included as Determined Capital

FE Licence

Expenditure at the next Review (adjusted for the applicable rate of return over the period since it was incurred).

Informal Review for Increase in Non-Controllable Operating Expenditure

- 4.5.8 Where the Licensee can demonstrate to the Authority's reasonable satisfaction that the event referred to in Condition 4.5.9 has occurred, and to the extent that the Authority determines that the additional expenditure referred to in Condition 4.5.9 is Operating Expenditure, such Operating Expenditure shall be included as Determined Operating Expenditure at the next Review (adjusted for the applicable rate of return over the period since it was incurred).
- 4.5.9 The event referred to in Condition 4.5.8 is that the Best Available Operating Expenditure in the Formula Year in which the Licensee is seeking the determination referred to in Condition 4.5.8, or in any future Formula Year up to and including *n*, is greater than the Determined Operating Expenditure for the Formula Year in question by a factor of 15% (or more), and that such increase is attributable to Unanticipated Operating Expenditure in respect of that Formula Year.

Condition 4.6 Reporting Requirements

Statements & Other Information

4.6.1 Following each Formula Year t , the Licensee shall give to the Authority a statement, at a time, in such form and accompanied by such supporting information (including an appropriate statement from its auditors in the form specified in Condition 1.2.6) as the Authority may direct, setting out the Actual Values for each of the factors for which Determination Values were previously established and in respect of those Formula Years during which the price control set out in this Part 4 has applied up to and including Formula Year t .

Pricing Information

4.6.2 In advance of setting the Controlled Charges in respect of Formula Year t , the Licensee shall give to the Authority a statement, at a time, in such form and accompanied by such supporting information as the Authority may direct, setting out:

- (a) the Licensee's detailed charging proposals for Formula Year t ;
- (b) the Formula Year t values used by the Licensee for each of the parameters referred to in the calculations that underpin the maximum amount recoverable under the charging methodology set out in Condition 4.1;
- (c) a demonstration of how the charging methodology requirement applying to Formula Year t would be satisfied by the adoption of the Licensee's charging proposals; and
- (d) an explanation for any significant variation from zero in the value of $Z_{F,i,t-1}$ and an outline of the Licensee's proposals for reversing any positive value (accumulated over-recovery) or sustaining any negative value (accumulated under-recovery) in $Z_{F,i,t}$.

- “Best Available” used as an adjective in relation to another defined word or phrase, means the Best Available Value to be attributed to it;
- “Best Available Value” means, in relation to any quantifiable term and at the time that quantifiable term is being assessed, a value which, in

The Designated Parameters set at one Review will (subject to Condition 4.5.2) apply unless and until revised at the next Review. Unless a Designated Parameter has a t

FE Licence

subscript, the value set at a Review must be the same for each Formula Year in the period $t=n+1$ to $t=q$;

“Determined” used as an adjective in relation to another defined word or phrase, means the Determination Value to be attributed to it;
